# Labelling system

## Four steps to perfect labelling with THURScript

Using the advanced **THURScript** labelling system, all Thur Metall products and most partition materials can be simply and clearly labelled. The labelling software can be downloaded easily and free of charge from the Thur Metall website. The labels are specially designed to be used with the software and are available as A4 sheets. They can be used in all commercially available printers. As a result, the range of individual label designs is virtually unlimited.

### Step 1

Free download:  
[www.thurmetall.com/thurscript.php](http://www.thurmetall.com/thurscript.php)

### Step 2

Design: Design the label using **THURScript** labelling software.

### Step 3

Print: Print the labels on **THURScript** labels and detach them in the desired size at the perforated points.

### Step 4

Slide in: Take the viewing window out of the handle on the drawer and simply slide the label in sideways.

### Benefits

- Very easy to create individual Thur Metall labels
- With text, colours, images and barcode generation
- Data import via database connection possible
- High flexibility thanks to various label sizes and perforated A4 sheets
- Printable with any commercially available printer
